

5 Analysis

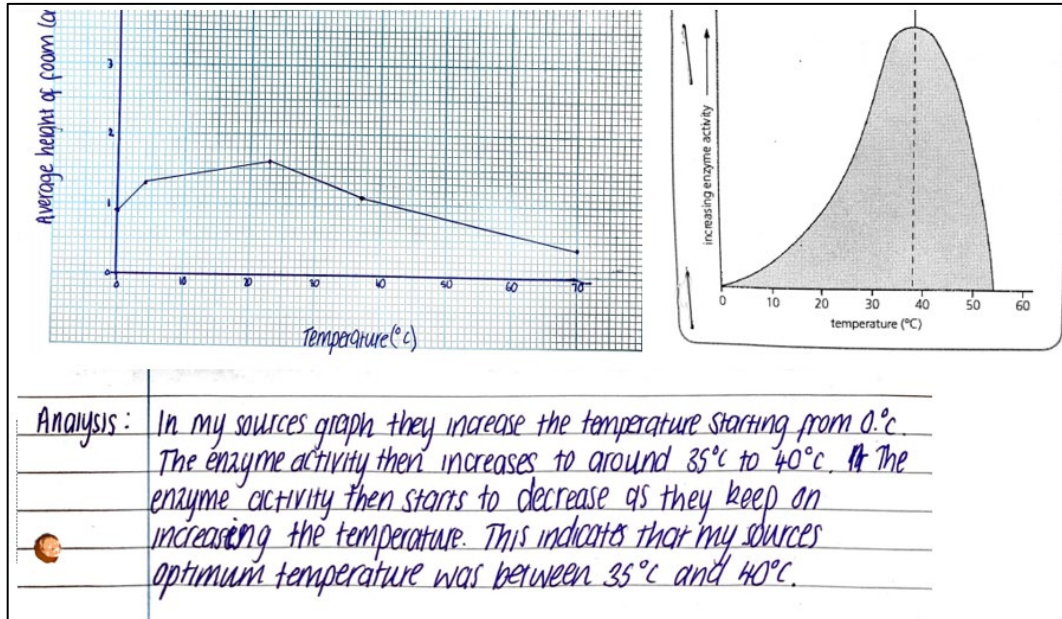

Example 1

vegetable sources	time taken for disc to fall and rise (seconds)			
	tube 1	tube 2	tube 3	average
carrot	10	7.6	7.4	8.5
cucumber	7.3	6.4	8.3	7.5
potato	5.7	5.6	5.7	5.7

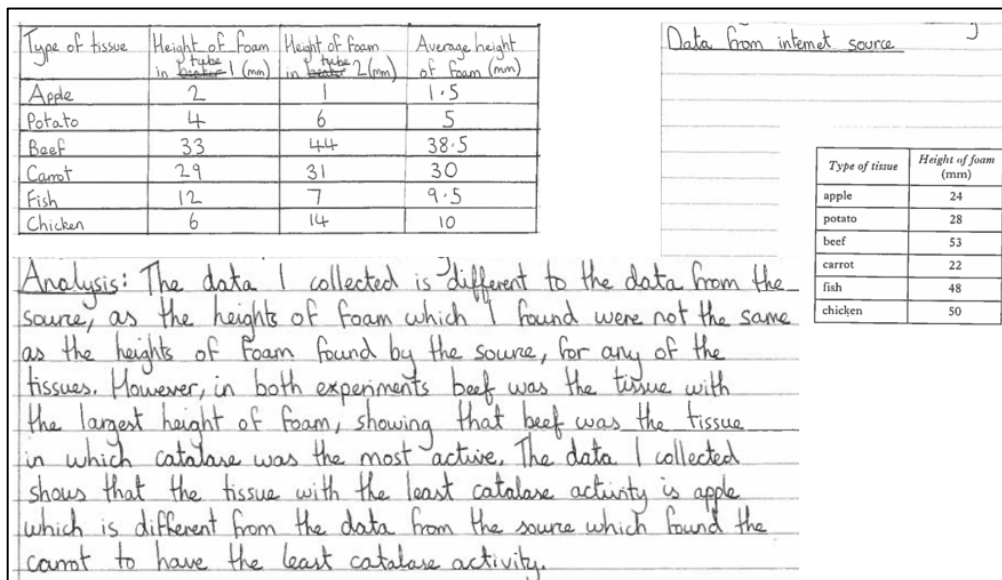

Type of tissue	Time for disc to return to the surface (s)
Apple	108
Banana	44
Carrot	68
Liver	8
Onion	70
Potato	72

I found that potato contained the most amount of catalase as the time taken for the disc to fall and rise was the shortest however the online source found that carrot was in fact the vegetable source that contained the most catalase. I also found ^{that in my experiment} cucumber contained the smallest amount of catalase whereas the online source found that potato contained the least.
